

# WASTE MANAGEMENT SERVICES

Stewart's provides comprehensive waste management solutions to a broad range of industries: Power Generation, Metal Finishing, Colleges & Universities, Manufacturing, Pharmaceutical, Construction, Municipalities, Public School Districts, etc.

We're prepared to assist with regularly-scheduled disposal services and special one-time events--technical aspects of waste packaging and disposal coordination are our specialty.

Working closely with you, our team will assist in the development and implementation of comprehensive, waste management and environmental programs designed to meet and exceed your regulatory compliance requirements while maintaining budgetary needs.

From collecting samples, preparing profiles, packaging the waste all the way through the transportation and disposal of your waste, the Stewart's team will minimize your risk and help you navigate the ever-changing regulatory climate.
